

**COASTAL IMPACT ASSISTANCE PROGRAM
PROJECT SUMMARY**

Project Title	Allocation	Description
Program Administration	235,670	Administrative costs for a CIAP Coordinator and administrative support. Coordinator will administer the competitive grant program, supervise development of the information system and resource inventory and oversee all CIAP projects and expenditures.
Competitive Grant Program	3,100,000	The grant fund is dedicated to coastal education projects and projects that deal with conservation, restoration, enhancement or protection of coastal and marine areas, including wetlands and watersheds. Any person or entity may apply for and receive a grant for a qualifying project.
Ocean, Coastal, and Watershed Information System	1,700,000	DGC will develop a computer based information system that provides Alaska ocean, coastal and watershed information in a manner that is readily useable to the public, government agencies and policymakers. Development of the system will be coordinated with other state resource agency information systems to reduce duplication and ensure a broad range of ocean, coastal and watershed information is made useable.
Coastal Resource Inventory	800,000	DGC will compile a catalogue of existing coastal resource data and information, determine local information needs, identify resource data gaps, coordinate data gathering efforts, and begin to fill data gaps as funds permit.
Regional Coastal Program Planning	750,000	DGC will develop regional coastal management plans for Prince William Sound, Northern Southeast and Southern Southeast. Regional plans will provide site-specific coastal policies to deal with coastal resource development in each area.
Cataloguing Anadromous Fish Streams	1,000,000	ADF&G will inventory anadromous waters and list the waters in the Anadromous Waters Catalog, focussing on areas at risk from future development activities. Listing streams provides ADF&G with the authority to protect anadromous fish habitat and water quality.
Oceans and Watershed Symposium and Report	150,000	The State will sponsor a symposium bringing together scientists, state and federal agencies, universities, stakeholders, and members of the public to assess the state of Alaska's oceans, coasts and watersheds. Results of the symposium will be incorporated into a State of the Oceans and Watersheds Report that includes policy recommendations for addressing ocean, coastal and watershed management.
Grant Funds for Coastal Districts	200,000	Funds will be used to increase the amount available under a federal grant program for the state's thirty-five coastal resource districts to conduct special projects (such as updating coastal district management plans).
Total	7,935,670
